

Preparation

A speaker who wants to use live polling should prepare the questions in advance. During the presentation, the technician displays the results on the main screen so the speaker can focus on the content.

- Prepare questions and answer options in PowerPoint or the event admin.
- Agree with the technician on when to open and display each poll.

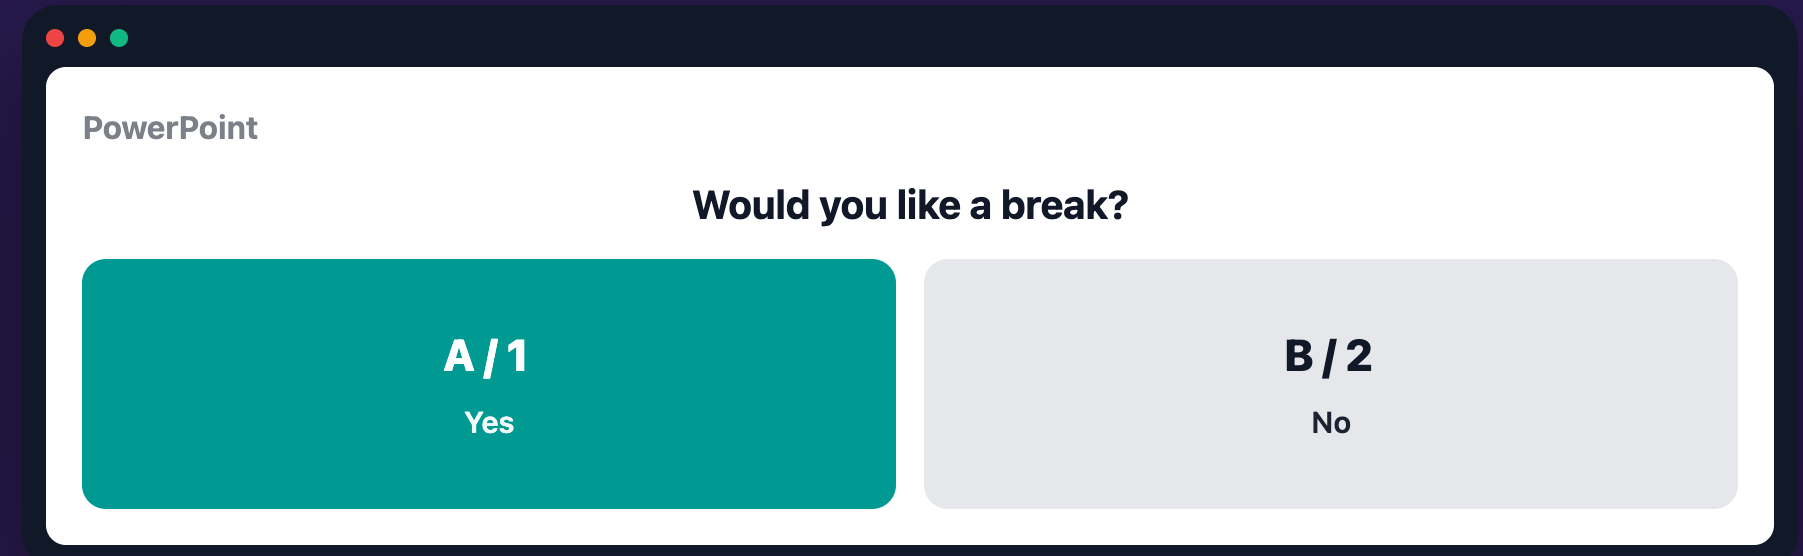

Presentation – With technician

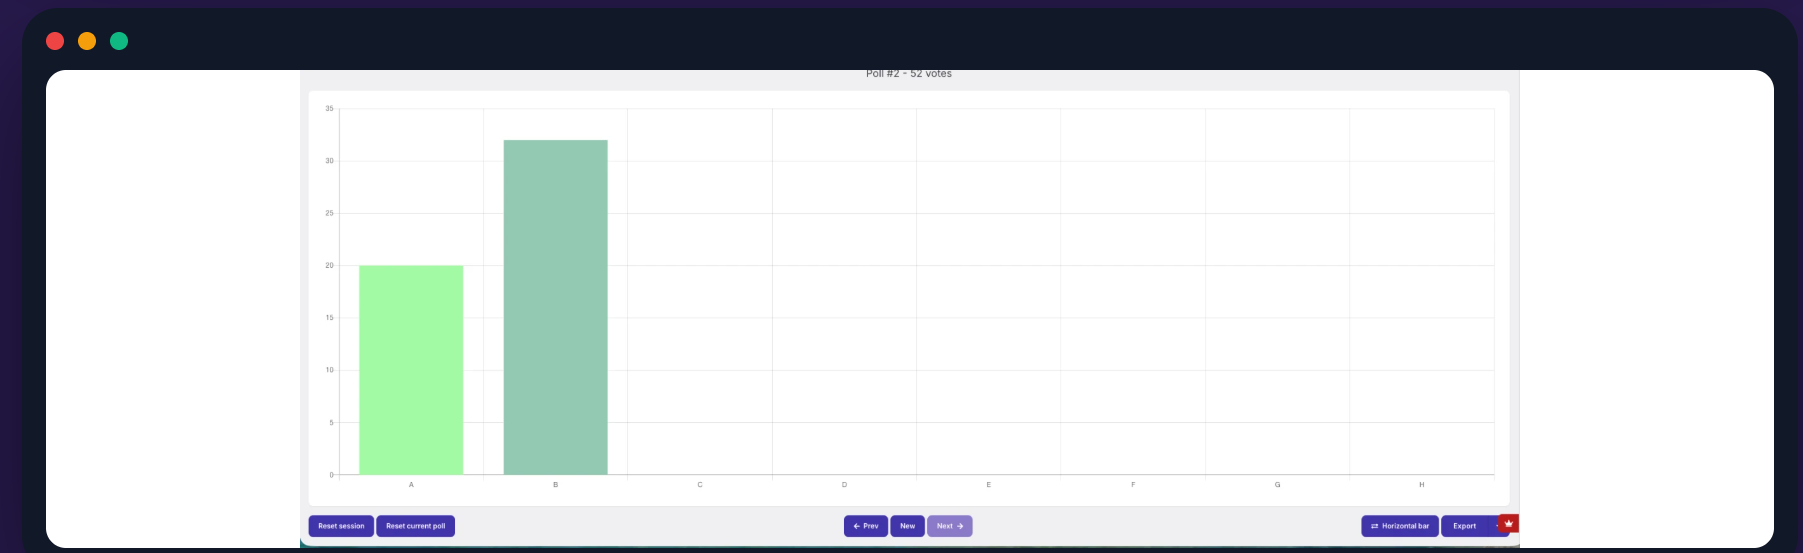

WITH TECHNICIAN ON SITE

- 1 The speaker reviews their slides and marks where each poll should appear.
- 2 The technician opens the live polling view in the browser and prepares the correct session.
- 3 When the speaker says so, the poll opens and the audience votes in the app.
- 4 Results are shown on the main screen and the technician switches back to PowerPoint.

1 • Your PowerPoint slide

2 • Result – shown separately

Presentation – On your own

ON YOUR OWN – NO TECHNICIAN

- 1 The speaker prepares the questions in PowerPoint and in the polling tool.
- 2 Before the session, the speaker opens the polling view in a separate browser tab.
- 3 When it's time, the speaker opens the poll themselves and the audience votes in the app.
- 4 The speaker switches to the results view on the main screen, then back to PowerPoint.
